iLab Solutions Announces Move to New Premises & Brand Refresh

iLab Solutions has today unveiled a new brand identity, reflecting the company's ongoing growth and development, alongside a move to new premises. The expansion follows the company's recent success in securing new service contracts with key players in the industry.

For over a decade iLab Solutions has been helping organizations get the most out of their AKTA FPLC platforms, delivering preventative maintenance, breakdown & repair services quickly and efficiently, providing our customers with excellent service and support.

Our new modernized logo refreshes our brand and we are excited for the new opportunities the future will bring as we continue to grow.

Our core values have not changed. Customer Satisfaction, Quality and Integrity are still the values we nurture and share – both towards our respected clients, partners and our devoted staff.

Managing Director, James Bull, commented:

"I'm delighted to announce that following further expansion, iLab Solutions have relocated to new, bigger premises. This move has given us more office space from which to serve our customers and co-ordinate our field engineers, plus an expanded lab workshop space where we can carry out repairs, refurbishments and engineer training. This is an exciting time for iLab and I am proud of our team and their achievements that have brought us to this point.

Our expansion and relocation was the ideal time for us to look at our brand that has served us well for the past 8 years and see how this could be refreshed and modernised. I am very pleased with the new look and feel, and believe it reflects our commitment to ongoing improvement and innovation in our business."
